

Good Day,

As many of you already know, our industry has been impacted by several external factors that have increased our costs for delivering you the very best in lighting products. While we have been able to absorb these increases over the last several months, we are now at a point where an increase must be passed along to ensure you continue to receive the best service and products we can provide.

Effective November 1st, all fixture products from both GREEN CREATIVE and ILP will see an increase from 4% - 13%. Lamps will not see an increase at this time.

Please contact your local Sales agent for updated pricing. These updated pricing guides will be in their hands in the coming weeks.

Please also keep in mind that an additional increase could be announced in early 2019, pending the outcome of the current geopolitical environment. In the meantime, both brands will continue looking for ways to reduce the current increase, plus any future impacts, while delivering you the very best in lighting products.

Sincerely,

David Weinberg
VP of Marketing & Product Management
Green Creative & ILP
