NEW PRODUCT RELEASE

JLC-Tech offers a NEW quality U.S. made product at exceptional savings with their T-BAR ECO DC!

High Performance • Lower Price Point • Fast Delivery

JLC-Tech, a pioneer for architecturally integrated LED lighting, is proud to announce a new product in their T-BAR LED family, the T-BAR ECO DC. This fantastic new offering from JLC-Tech is ideal for a wide range of retrofit and new construction commercial applications where price and quality make the perfect marriage. Available for immediate ordering.

This special product was created to target design-build contractors and customers looking for “good value” in their choice of lighting products yet not sacrifice excellent light distribution, aesthetics and quality manufacturing. The T-BAR ECO DC is offered in 2- and 4-foot lengths specifically for 15/16” grid ceiling systems. It delivers up to 110 lumens per watt using only 5.6 W/ft. This highly efficient product leverages JLC-Tech’s patented technology directly replacing the cross tees in a suspended ceiling. Two mounting options include a clip specially designed for Armstrong grid ceilings or a universal clip for all other grid ceilings. General illumination is maximized with a high-efficient opal white round or square diffusing lens.

The T-BAR ECO DC model is a 24VDC low-voltage light fixture that requires a remotely installed driver. The remote power supply has an integrated junction box and is rated for plenum installations, with a 120–277VAC input and 0–10VDC dimming. The safe Class 2 wiring allows for a simple electrical installation as well as the option to connect directly into DC powered micro-grid buildings.

JLC-Tech – “Where no light has gone before!”

"Customers love our lighting products for the quick and efficient way they install, for their safe low-voltage wiring and for the flexibility to move them around with ease when a room becomes repurposed," says Mia Antonia, Principal Partner of JLC-Tech. "We saw the demand for a product that could meet contractors' quick-ship and fast track design-build pricing needs. The T-BAR ECO DC answers that need utilizing more basic features but with the same high-quality engineering and U.S. built standards JLC-Tech is proud to include with all our products."

Weigand Associates, Inc. – Germantown, MD

Product Feature

- ✓ Low profile design
- ✓ T-Grid and LED light combined
- ✓ Snap-in installation
- ✓ Flexible design layouts
- ✓ Made in Pembroke, MA - U.S.A.
- ✓ U.S. quality & competitively priced
- ✓ Designed for long life

Customer Benefit

- No plenum occupancy
- Optimized acoustic levels
- Reduced installation costs
- Distribute light where needed
- Quick Ship
- Cost savings
- Backed by 5-year warranty
